Join OPHA on Sunday, October 9th for a hands-on training in data visualization best practices!

Are you interested in making your PowerPoint presentations more powerful? Do you want your data visuals to shine? This half-day workshop is open to all levels of public health professionals pursuing opportunities to develop skills in providing accurate, engaging and meaningful data visualizations. Come learn about the foundations and theory behind effective data visualization, and the importance of using best practices for displaying data. This workshop will arm you with resources for continued learning and give you the skills needed to present effectively!

Presented by:

Sarah Hargand, MPH
Surveillance and Evaluation Systems Lead
Health Promotion & Chronic Disease Prevention, Oregon Health Authority

Steven Fiala, MPH
Senior Research Analyst
Program Design & Evaluation Services, Oregon Health Authority

Vicky Buelow, MA
Research Analyst
Health Promotion & Chronic Disease Prevention, Oregon Health Authority

Learning Objectives: At the end of this presentation, the participants will be able to:

1. Describe best practices for data visualization and the science behind these best practices
2. Discuss the importance of using best practices to ensure meaningful use of data
3. Identify ways in which one could implement best practices in her or his organization
4. Apply data visualization best practices through hands-on activities
